

Guest Speaker

LiDAR Applications in the Appalachians and Andes

Paul Kinder

Director of Science & Technology, Canaan Valley Institute
OSU Geography MA, 1994

This seminar presents an excellent opportunity for interested students to learn about state-of-the-art LiDAR (Light Detection and Ranging) technology in a seminar featuring new data acquired over the Andes & Appalachians. Paul Kinder received his Master's degree from OSU geography in 1994, specializing in spatial analytic methods. He is currently Science and Technology Director at the Canaan Valley Institute, using geospatial tools in multidisciplinary endeavors. Weather and time permitting, there will be a tour of equipment and aircraft at the OSU airport, and a data acquisition flight will be made over the OSU oval.
